Activity 1: Using HTML Tags and Attributes

Objective: The objective of this lab activity is to familiarize yourself with HTML tags and attributes by creating and structuring a basic webpage. You will explore key HTML elements, apply various attributes, and practice formatting content. Be sure to test your code and validate proper implementation.

Instructions:
Create a 3-page website using the following tags. The website may have any content according to your preference. Note that all listed tags below must be used.

1. Heading Tags
2. Paragraph Tag and Attributes
3. Horizontal Rule Tag
4. Center Tag
5. Formatting Tags
   o
   o
   o <code></code>
   o <kbd></kbd>
   o <var></var>
   o <cite></cite>
   o
   o <i></i>
   o <u></u>
   o <tt></tt>
   o
   o
6. Hyperlink/Anchor Tag and Attributes
   o Link to another webpage
   o Link to an external website
   o Link to another section of a webpage
   o Link to an email
7. Font Tag and Attributes
8. List Tags and Attributes
   o Ordered List
   o Unordered List
   o Definition List

Deadline:

The final output is due by February 21, 2024 and will be checked in the Laboratory for verification. No need to submit in Google Classroom.

Grading:
10 points for every correct item. 0 points for every incorrect item.
